Tables of Contents — 2002

February 2002

Articles

A Review of Techniques for Instrumentation Design and Upgrade in Process Plants • *Miguel Bagajewicz* 3
Cold and Hot Gas Filtration using a Novel Mobile Granular Bed with an Inner Fluidized Section • *Nicolas Abatzoglou, Martin Gagnon and Esteban Chornet* 17
A Simple and Effective Model for Cross-Flow Microfiltration and Ultrafiltration • *Anais (Alice) A. Makardij, Mohammed M. Farid and Xiao Dong Chen* 28
Axial Distribution of Solids Holdup for Both Hydrophilic and Hydrophobic Particles in Three-Phase Fluidized Beds • *Ji-Yu Zhang, Cheng Lin and Chun-Shen Lin* 37
Prediction of Gas Hold-up in a Bubble Column Filled with Pure and Binary Liquids • *Sultana R. Syeda, Artin Afacan and Karl T. Chuang* 44
Gas Recirculation Rate and Its Influences on Mass Transfer in Multiple Impeller Systems with Various Impeller Combinations • *Wei-Ming Lu, Hong-Zhang Wu, Cheng-Ying Chou* 51
γ-Alumina Supported Cu-Ni Bimetallic Catalysts: Characterization and Selective Hydrogenation of 1,3-Butadiene • *Min Kang, Min Woo Song, Tae Won Kim and Kyung Lim Kim* 63
Kinetics of the Photocatalytic Total Oxidation of Different Alkanes and Alkenes on TiO_2 Powder • *Olaf Kleinschmidt and Diethard Hesse* 71
A Catalyst Deposited over the External Surface of the Reactor Tubes – A New Solution for Carrying out Heterogeneous Catalytic Processes • *Asen I. Anastasov and Valentin A. Nikolov* 79
Monitoring of Emulsion Polymerisations: A Study of Reaction Kinetics in the Presence of Secondary Nucleation • *Nida Othman, Amilton M. Santos, Gilles Févotte and Timothy F. McKenna* 88
Analysis of Flux Decline during Ultrafiltration of Sugarcane Juice (Limed) using Cross Flow Cell • *Uppaluri V.S. Rama Gopal, Nishith Verma and Prashant K. Bhattacharya* 105
Diffusivity of CO_2, CH_4, C_2H_6 and N_2 in Athabasca Bitumen • *Simant R. Upreti and Anil K. Mehrotra* 116
An Apparatus for the Measurement of Surface Tensions at High Pressures and Temperatures • *Jacques P. Millette, Donald S. Scott, Irvine G. Reilly, Piotr Majerski, Jan Piskorz and Desmond Radlein and Theo J.W. deBruijn* 126
Modelling and Economic Analysis of Gas Production from Hydrates by Depressurization Method • *Santanu Khataniar, Vidyadhar A. Kamath, Sunday D. Omenihu, Shirish L. Patil and Abhijit Y. Dandekar* 135
Perturbation Signal Design for Neural Network Based Identification of Multivariable Nonlinear Systems • *Pankaj S. Kulkarni and Ravindra D. Gudi* 144

R&D Notes

Liquid Holdup in Concentric Annuli during Cocurrent Gas–Liquid Upflow • *Gargi Das, Prasanta K. Das, Nalani K. Purohit and Arun K. Mitra* 153
Gas Hold-up in Stirred Tank Reactors • *Archis A. Yawalkar, Vishwas G. Pangarkar and Anthony A.C.M. Beenackers* 158
Extended Kalman Filter Based Nonlineaer Geometric Control of a Seeded Batch Cooling Crystallizer • *Wei Xie, Sohrab Rohani and Aaron Pheonix* 167

Book Review

Industrial Gases in Petrochemical Processing, by **Harold Gunardson** • Reviewed by Jacques L. Bousquet 173

Art & Science: The 'Birth' of Leonardo da Vinci in Images • *Abraham Tamir* 174

Summary of Policy on the Use of SI Units 175
Call for Papers, GLS-6 176
Instructions to Authors I.B.C

April 2002

Articles

Bubble Characteristics of a Scaled-Down Three-Phase Fluidized Bed • *Mike Safoniuk, John R. Grace and Kok-Seng Lim* 177
Packed Bed Structure: Evaluation of Radial Particle Distribution • *Néstor J. Mariani, Wilson I. Salvat, Osvaldo M. Martínez and Guillermo F. Barreto* 186
Modified Volume Expansion Method for Measuring Gas Holdup • *Annie X. Meng, Gordon A. Hill and Ajay K. Dalai* 194
An Investigation of Complex Hybrid Suspension Flows by Magnetic Resonance Imaging • *Lachlan J.W. Graham and Lionel Pullum* 200
Effect of Glucose on Photocatalytic Decolorization of Dyes by TiO_2 • *Katsushi Kunitou, Shingo Maeda, Setsuaki Hongyou and Kenji Mishima* 208
The Mixing Sensitivity of Polysulphide Generation • *Heather K. Dobson and Chad P.J. Bennington* 214
Extraction of a Dissolved Organic Contaminant from Water into an Aqueous Surfactant Solution across a Microporous Membrane • *Sarah Marx and Martin E. Weber* 224
Reaction Rate Hysteresis in the Hydrotreating of Thiophene in Wide- and Narrow-Pore Catalysts during Temperature Cycling • *Shohreh Fatemi, Mohammad A. Moosavian, Giti Abolhamd, Yadollah Mortazavi and Robert R. Hudgins* 231
Improved Modelling of the Unsteady-State Behaviour of an Immobilized-Cell, Fluidized-Bed Bioreactor for Phenol Biodegradation • *Kira A. Onysko, Campbell W. Robinson and Hector M. Budman* 239
Rheological Examination of Temperature Dependence of Conventional and Polymer-Modified Road Bitumens • *Andreja Zupančič and Miha Žumer* 253
Comparison of Experimental and Computational Results in a Cyclic Flow • *Wei Li, Pierre E. Sullivan and Jeffrey A. Davis* 264
Generic Model Controller Tuning for Chemical Processes with Input Saturation • *Bingjun Guo, Xiangming Hua and Arthur Jutan* 275
Hydrodynamics of Gas Fluidized Beds with Mixture of Group D and B Particles • *Abdelhamid Ajbar, Khalid Alhumaizi, Ahmed Ibrahim and Mohammad Asif* 281

R&D Notes

A Simple Correlation for Gas Bubbles Rising in Power-Law Fluids • *Denis Rodrigue* 289
Experimental Research on Drag Reduction by Polymer Additives in a Turbulent Pipe Flow • *Shao Xueming, Lin Jianzhong, Wu Tao and Li Yulin* 293
Bubble Coalescence and Its Effect on Dynamic Foam Stability • *Yoon Seong Cho and Janusz S. Laskowski* 299
Prediction of Dispersed Phase Holdup in a Modified Multi-Stage Bubble Column Scrubber • *Bhim C. Meikap, Gautam Kundu and Manindra N. Biswas* 306
Influence of Liquid Viscosity and Bed Porosity on Two-Phase Pressure Drop in Concurrent Gas–Liquid Upflow Through Packed Beds • *Ahamed Khan, Asad Ali Khan and Y.B.G. Varma* 313
Pressure Drop for Single and Two-Phase Flow of Non-Newtonian Liquids in Helical Coils • *S.V.S.R. Krishna Bandaru and Rajendra P. Chhabra* 315
Effect of Mixed Solvent on Selective Removal of Lead (II) Ions by Dicyclohexano-18-crown-6 from Aqueous Solutions Containing Heavy Metals • *Stella Dernini, Annalisa Loi, Simona Palmas and Anna M. Polcaro* 322

An Optimization Model of the Operating Costs of a Fluidized Bed Steam-Drying Plant • *Stefan Heinrich, Matthias Ihlow, Markus Henneberg, Gerhard Krüger and Lothar Mörl* 326

Book Review

Computational Flow Modeling for Chemical Reactor Engineering, by Vivek V. Ranade • *Reviewed by R.E. Hayes* 334

Art & Science: Reflection of Archimedes' Law in Art • *Abraham Tamir* 336

Contents Pages for *Chemical Engineering Research and Design* 325, 335

Instructions to Authors I.B.C

June 2002

Articles

Flow Regimes in a Turbulent Bed Contactor • *Bruce E.R. Albert, Sai S.T. Pillutla and Krishnaiah Kamatam* 337

Pressure Buildup in Gas–Liquid Flow through Packed Beds due to Deposition of Fine Particles • *Murray R. Gray, Naras Srinivasan and Jacob H. Masliyah* 346

Short Fibers Suspension in Steady Recirculating Flows • *Francisco Chinesta and Guillaume Chaidron* 355

Étude de l'évaporation par convection forcée au-dessus de corps tournants à symétrie de révolution dans un fluide au repos • *Belkacem Zeghmati, Philippe Nardin, Georges Le Palec et Daniel Rondot* 363

Free Convective Mass Transfer at Horizontal Single Screens and Arrays of Horizontal Screens in Relation to Electrochemical Reactor Design • *Gomma H. Sedahmed and Inder Nirdosh* 370

Drying of Solids in Vacuum Fluidized Bed • *Bulent Umur Kozanoglu, Juan Antonio Vilchez, Joaquim Casal and Josep Arnaldos* 376

Sequenced Aeration in a Membrane Bioreactor: Specific Nitrogen Removal Rates • *Marie-Laure Pellegrin, Christelle Wisniewski, Alain Grasmick, Annie Tazi-Pain and Hervé Buisson* 386

Fundamentals of Bitumen Coking Processes Analogous to Granulations: A Critical Review • *Murray R. Gray* 393

Membrane–Liquid Emulsion Membrane Process using Methane Sulfonic Acid as a Strippant • *Prashant S. Kulkarni, Krishna K. Tiwari and Vijaykumar V. Mahajani* 402

Effects of O_2 on Aqueous SO_2 Leaching of Co, Cu and Ni from Discard Smelter Slag • *Isaac B. Ahmed, Philip K. Gbor and Charles Q. Jia* 410

Extraction of Halide Quaternary Salts in a Organic Solvent/Water System: Hydrodynamics and Mass Transfer • *Ho-Shing Wu, Chien Bang Liu and Yan-Hun Lin* 421

A Generalized Equation for the Prediction of Melting Temperatures of Homopolymers and Copolymers • *Musa R. Kamal, Lijun Feng and Tao Huang* 432

Using Truncated Relaxation Spectra in the Simulation of Viscoelastic Flows • *Marie-Claude Heuzey, Paula Wood-Adams and André Fortin* 443

Flow-Assisted Corrosion of API X-52 Steel in 3.5% NaCl Solution • *Amarnath, T.K.G. Namboodhiri and S.N. Upadhyay* 456

Modeling of a Process for Removal of Metal Ions by Electromigration and Electrodeposition • *Kanchan Mondal, Jayasree Pattanayak, Nenad V. Mandich, Tomasz S. Wiltowski and Shashi B. Lalvani* 465

z-Transform and Adaptive Signal Processing in Analysis of Tracer Data • *Leszek Furman* 472

R&D Notes

Influence of Horizontal Return Bend on the Two-phase Flow Pattern in a 6.9 mm Diameter Tube • *Ing Youn Chen, Yung-Wei Yang and Chi-Chung Wang* 478

Gas Holdup in a Gassed Reciprocating Plate Column with Rashig Rings Placed in Interplate Spaces • *M. Aleksić, V.B. Veljković, Ivana Banković-Ilić, M.L. Lazić and D.U. Skala* 485

Distribution of the Free and Oil-Trapped Air Bubbles in Simulated Broths Containing Fungal Biomass • *C. Patricia Larralde-Corona, Ma. Soledad Córdova and Enrique Galindo* 491

Linear Viscoelasticity and Stress Growth in Blood • *Ning Sun and Daniel De Kee* 495

A Novel Technique for Local Mass Transfer Measurements • *Nader Mahinpey, Matadial Ojha, K. Wayne Johnston, Olev Trass* 499

Prediction of Gas-Phase Adsorption Isotherms using Neural Nets • *Sukanta Basu, Paul F. Henshaw, Nihar Biswas and Hon K. Kwan* 506

Measurement of Intrinsic Rates for Homogeneous Gas-Phase Reaction at High Temperatures • *Michael S. Kallos, Hilton Chin, Anil K. Mehrotra and Leo A. Behie* 513

The Best Performance of Spiral Wired Thermal Diffusion Columns of the Frazier Scheme • *Ho-Ming Yeh* 518

Removal of ^{230}Th by Solvent Extraction from High Grade Uranium Ore Liquid Tailings to Arrest ^{226}Ra Production in the Tailings • *Inderjit Nirdosh* 525

Calculation of Solubilities of the Pesticides Diuron and Monuron in Organic Nonelectrolye Solvents using UNIFAC and Modified UNIFAC (Dortmund) Models • *Carmen Riverol, Henrik K. Hansen and William Acree Jr.* 530

Transient Analysis of a Gas Manifold System • *Vineet Parolia, Nishith Verma and Raj Chhabra* 536

Art & Science: An Artistic Journey Through the Human Brain • *Abraham Tamir* 544

Contents page for *Chemical Engineering Research and Design* 517, 524

Instructions to Authors I.B.C.

August 2002

Preface to the Special Issue on Mixing • *Suzanne Kresta and Philippe A. Tanguy* 545

Articles

Laminar Mixing in Eccentric Stirred Tank Systems • *Mario M. Alvarez, Paulo E. Arratia and Fernando J. Muzzio* 546

Unconventional Configuration Studies to Improve Mixing Times in Stirred Tanks • *Gabriel Ascanio, Magdalena Brito-Bazán, Edmundo Brito-De La Fuente, Pierre J. Carreau and Philippe A. Tanguy* 558

Experimental Analysis of Hydrodynamics Induced by a Moritz HAS Impeller in Laminar and Turbulent Regimes • *Renaud Escudié, Alain Liné and Pierre Kiener* 566

Tracer Dispersion in Stirred Tank Reactors: Asymptotic Properties and Mixing Characterization • *Massimiliano Giona, Alessandro Paglianti, Stefano Cerbelli, Sandro Pintus and Alessandro Adrover* 580

Investigation of Flow Patterns in Continuous-flow Stirred Vessels by Laser Doppler Velocimetry • *Paul Mavros, Catherine Xuereb, Ivan Fořt and Joël Bertrand* 591

Power Consumption in the Turbulent Regime for a Coaxial Mixer • *Philippe A. Tanguy and Francis Thibault* 601

Morphology Development in Kenics Static Mixers (Application of the Extended Mapping Method • *Oleksiy S. Galaktionov, Patrick D. Anderson, Gerrit W.M. Peters and Han E.H. Meijer* 604

The Influence of Viscosity Ratio on Mixing Effectiveness in a Two-fluid Laminar Motionless Mixer • *Amy L. Ventresca, Qing Cao and Ajay K. Prasad* 614

Using a New Interfacial Area Transport Equation to Predict Interfacial Area in Co-current Jet Mixers • *Stephen L. Yarbro and Richard L. Long* 622

On the Applicability of the Grace Curve in Practical Mixing Operations • *Yvonne W. Stegeman, Frans N. van de Vosse and Han E.H. Meijer* 632
Flow Generated by an Aerated Rushton Impeller: Two-phase PIV Experiments and Numerical Simulations • *Niels G. Deen, Tron Solberg and Bjørn H. Hjertager* 638
Operational Characteristics of a New Energy-saving Impeller for Gas–Liquid Mixing • *Serafim D. Vlaev, Paul Mavros, Pavel Seichter and Reg Mann* 653
Simple Model to Evaluate Loading/Flooding Transition in Aerated Vessels Stirred by Rushton Disc Turbines • *Alessandro Paglianti* 660
Diagnosis of Solid Distribution in Vessels Stirred with Multiple PBTs and Comparison of Two Modelling Approaches • *Giuseppina Montante, Davide Pinelli and Franco Magelli* 665
Concept for Scale-up of Solids Suspension in Stirred Tanks • *Matthias Kraume and Peter Zehner* 674
Critical Impeller Speed for Suspending Solids in Aerated Agitation Tanks • *Yonggang Zhu and Jie Wu* 682
Measuring Volumetric Phase Fractions in a Gas–Solid–Liquid Stirred Tank Reactor Using an Impedance Probe • *Elisabetta Brunazzi, Umberto Di Festa, Chiara Galletti, Cesare Merello, Alessandro Paglianti and Sandro Pintus* 688
CFD Simulations of Three-dimensional Wall Jets in a Stirred Tank • *Sujit Bhattacharya and Suzanne M. Kresta* 695
On the Comparison between Probability Density Function Models for CFD Applications • *Davide Fissore, Daniele L. Marchisio and Antonello A. Barresi* 710
CFD Simulation of Solids Suspension in Mixing Vessels • *Nicholas C.S. Kee and Reginald B.H. Tan* 721

Regular Papers

Pressure Drop and Mass Transfer Study in Static Mixers with Gas Continuous Phase • *Annabelle Couvert, Marie-France Péculier and Alain Laplanche* 727
Flocculation Monitoring: Focused Beam Reflectance Measurement as a Measurement Tool • *A. Blanco, E. Fuente, C. Negro and J. Tijero* 734
An Aqueous Phase Equilibrium Calculation Algorithm • *Ajay Makkuni, Aaron V. Phoenix and Sohrab Rohani* 741
Determination of the Optimum Conditions for Zinc Extraction from Ore Containing Sphalerite by HCl Solutions • *Osman Nuri Ata, Murat Yeşilyurt, Sabri Çolak and Ayşe Vildan Beşe* 753

R&D Notes

The Effect of Adding Phosphate on the Size of Extremely Fine Needle-like Lepidocrocite Particles Prepared by Oxidizing an Aqueous Suspension of Ferrous Hydroxide • *Naoki Mihara, Hiroyuki Kawasaki, Hidehiro Kumazawa, Woo-Sik Choi, Jung-Sup Kwak and Hee-Kyu Choi* 764
Effects of Technological Factors on Electrochemical Hydrogenation of Lignin • *Jianan Zhang, Xiaoyong Zhang, Dongming Xie, Dehua Liu and Zuohu Li* 769
Dynamic Process Modelling using a PCA-based Output Integrated Recurrent Neural Network • *Yu Qian, Huanong Cheng, Xiuxi Li and Yanbin Jiang* 774

Art & Science: Mona Lisa's Gaze and Smile – Myth or Reality? • *Abraham Tamir* 780
Contents Page from *Chemical Engineering Research and Design*, July 2002 781
Summary of Policy on the Use of SI Units 782

October 2002

Articles

Settling Velocities of Polydisperse Concentrated Suspensions • *Zhanyao Ha and Shijie Liu* 783
Gas Hold-up in Stirred Tank Reactors in Presence of Inorganic Electrolytes • *Archis A. Yawalkar, Albertus B.M. Heesink, Geert F. Versteeg and Vishwas G. Pangarkar* 791
Solids Circulation Flux and Gas Bypassing in a Pressurized Spout-fluid Bed with a Draft Tube • *Rui Xiao, Mingyao Zhang, Baosheng Jin and Xiangdong Liu* 800
Some Issues on Core-annulus and Cluster Models of Circulating Fluidized Bed Reactors • *Hsiaotao T. Bi* 809
Flow of a FENE Fluid in Packed Beds or Porous Media • *William Kozicki* 818
Unified Approach using the Linear Packing Theory and Unit Cell Model • *Murlidhar Gupta, Jin Yan and Christian Roy* 830
Gas–Liquid Mass Transfer coefficient in Stirred Tank Reactors • *Archis A. Yawalkar, Albertus B.M. Heesink, Geert F. Versteeg and Vishwas G. Pangarkar* 840
Prediction of the Crevice Corrosion Incubation Period of Passive Metals at Elevated Temperatures: Part I – Mathematical Model • *Kevin L. Heppner, Richard W. Evitts and John Postlethwaite* 849
Prediction of the Crevice Corrosion Incubation Period of Passive Metals at Elevated Termperatures: Part II – Model Verification and Simulation • *Kevin L. Heppner, Richard W. Evitts and John Postlethwaite* 857
An Extensive Analysis on the Start-up of a Simple Distillation Column with Multiple Steady States • *Sonia J. Benz and Nicolas J. Scenna* 865
Preparation and Kinetic Considerations for the Dissolution of Cr-substituted Iron Oxides in Reductive-complexing Formulations • *Jayappa Manjanna and Gopala Venkateswaran* 882
Multicriteria Optimization of a High-Yield Pulping Process • *Jules Thibault, Robert Lanouette, Christian Fonteix and Laszlo N. Kiss* 897
NiMo Supported on Faujasite-modified Al_2O_3 as Catalysts for the Hydrotreatment of a Light Cycle Oil/Straight Run Gas Oil Mixture • *Celia Marín, José Escobar, Ernesto Galván, Forentino Murrieta, René Zárate and Víctor Cortés* 903
A Trend to the Production of Calcium Hydroxide and Precipiated Calcium Carbonate with Defined Properties • *Hilja Lõhmus, Ahto Räni, Urve Kallavus and Rein Reiska* 911
Modelling the Effective Thermal Conductivity in Polydispersed Bed Systems: A Neural Optimization of FedBatch Streptokinase Fermentation in a Non-ideal Bioreactor • *Pratap R. Patnaik* 920
Prediction of High Pressure Phase Equilibria using Cubic EOS: What Can Be Learned? • *Illya Polishuk, Roumiana P. Stateva, Jaime Wisniak and Hugo Segura* 927
Thermal Sensor to Monitor Mechanical Properties in Polymer/Fiber Composite Molding • *David Rouison, Milena Varejka and Jules Picot* 943
A Mathematic Model for Direct Causticization of Na_2CO_3 with TiO_2 in a Semi-batch Reactor • *Le Zeng and Adriaan R.P. van Heiningen* 948
Assessing the Performance of Model Predictive Controllers • *Rohit S. Patwardhan, Sirish L. Shah and Kent Z. Qi* 954

R&D Notes

Spout Shape Predictions in Spouted Beds • *Éverton F. Zanoelo and Sandra C.S. Rocha* 967
Wall Effects for the Free Rise of Solid Spheres in Moderately Viscous Liquids • *Kevin H. Dewsbury, Aristotelis Tzounakos, Dimitre G. Karamanev and Argyrios Margaritis* 974
Gas–Liquid Flow Through Helical Coils in Horizontal Orientation • *Sailendra Nath Mandal and Sudip Kumar Das* 979
On the Characteristic Drying Rate Approach to Correlating Experimental Results of the Drying of Moist Porous Materials • *Xiao Dong Chen* 984
Predicting the Distribution Constants of Butane Extraction of Organic Pollutants from Aqueous Solubility • *Khay-Chuan Teo, Chun Yang and Yan-Rong Xu* 991

Preparation and Kinetic Considerations for the Dissolutiuon of Cr-substituted Iron Integrated Scheme of Natural Gas Usage with Minimum Production of Entropy • *Michael S. Granovskii, Mikhail S. Safonov and Sergey B. Poxharskii* 998

Art & Science: The Third Law: No Way to Absolute Zero • *Abraham Tamir* 1002

Call for Papers: 53rd Canadian Chemical Engineering Conference 1003
Call for Papers: "Bhopal and its Effects on Process Safety" 1004
Summary of Policy on the Use of SI Units 1005
Instructions aux auteurs 1006
Instructions to Authors I.B.C.

December 2002

Special Issue

Preface to the Special Issue dedicated to the memory of Prof. Abdellatif AïtKadi • *Mosto Bousmina and Pierre Carreau* 1007

Articles

Compatibilization of Polymer Blends • *Leszek A. Utracki* 1008
Morphology in Immiscible Polymer Blends During Solidification of an Amorphous Dispersed Phase under Shearing • *Yves Deyrail, Alain Michel and Philippe Cassagnau* 1017
Drop Deformation and Breakup Mechanisms in Viscoelastic Model Fluid Systems and Polymer Blends • *Frej Mighri and Michel A. Huneault* 1028
Online Light Scattering Measurements as a Means to Assess Influence of Extrusion Parameters on Non-reactive Polymer Blend Morphology: Experimental Procedure and Preliminary Results • *Christophe Serra, Guy Schlatter, Michel Bouquey, René Muller and Jean Terrisse* 1036
Dependence of the Morphology Development on the Kinetics of Reactive Melt Blending of Immiscible Polymers • *Z. Yin, C. Koulic, C. Pagnoulle and R. Jérôme* 1044
Modelling of the Nonlinear Behavior of Compatibilized Polyethylene/Polyamide Blends in Shear and Extensional Flows • *Jacques Huitric, Michel Moan and Marie-Hélène Klopffer* 1051
Interrelations between Rheology and Phase Behaviour in Partially Miscible Blends: The Case of Polydimethylsiloxane/Polyethylmethylsiloxane (PDMS/PEMS) • *Divya Chopra, Marianna Kontopoulou, Dimitris Vlassopoulos and Savvas G. Hatzikiriakos* 1057
Evolution of Chemistry, Morphology and Rheology of Various Polymer Systems along a Twin-Screw Extruder • *José A. Covas, Olga S. Carneiro, João M. Maia, Susana A. Filipe and Ana V. Machado* 1065
Synthesis of Oligoester α,ω-diols by Alcoholysis of PET through the Reactive Extrusion Process • *Morgane Dannoux, Philippe Cassagnau and Alain Michel* 1075
Polymer-Clay Nanocomposites Based on Blends of Polyamide-6 and Polyethylene • *Mahmood Mehrabzadeh and Musa R. Kamal* 1083
Fiber Suspensions in Complex Geometries: Flow/Orientation Coupling • *Brent E. VerWeyst and Charles L. Tucker III* 1093
Numerical Analysis of the Coupling Between the Flow Kinematics and the Fiber Orientation in Eulerian Simulations of Dilute Short Fiber Suspensions Flows • *Francisco Chinesta and Arnaud Poitou* 1107
Numerical Modelling of the Flow of Fibre Suspension Through a Planar Contraction • *Jalal Azaiez and Robert Guénette* 1115
Linear Viscoelastic Properties of Suspensions of Rigid Hairy Particles in a Polymeric Matrix • *Sylvie Dagréou, Abdeslam Kasseh, Ahmed Allal, Gérard Marin and Abdellatif Aït-Kadi* 1126
A Chemical Model for the Dispersion of Fillers in a Polymeric Matrix • *Tomas Lozano, Pierre G. Lafleur and Miroslav Grmela* 1135
Present Challenges in the Numerical Modeling of Polymer-forming Processes • *Bruno Vergnes, Michel Vincent, Yves Demay, Thierrey Coupez, Noëlle Billon and Jean-François Agassant* 1143
Paste Extrusion of Polytetrafluoroethylene (PTFE) Fine Powder Resins • *Alfonsius B. Ariawan, Sina Ebnesajjad and Savvas G. Hatzikiriakos* 1153
Quantitative Analysis of Mixer-Type Rheometers using the Couette Analogy • *Abdellatif Aït-Kadi, Philippe Marchal, Lionel Choplin, Anne-Sophie Chrissemant and Mosto Bousmina* 1166
Yield Stress Measurement of Silicon Nitride Suspensions • *Lixuan Zhu, Kyriakos Papadopoulos and Daniel De Kee* 1175
Rheological Behavior of Coating Colors: Influence of Thickener • *Agnès Page, Pierre J. Carreau, Michel Moan and Marie-Claude Heuzey* 1181
Orifice Flowmeter for Measuring Extensional Rheological Properties • *Gabriel Ascanio, Pierre J. Carreau, Edmundo Brito-De La Fuente and Philippe A. Tanguy* 1189
Diffusion of One- and Two-component Fluids into Polymeric Membranes • *Ali El Afif and Miroslav Grmela* 1197
Molecular Weight Polydispersity Effects on Diffusion at Polymer/Polymer Interfaces • *Hua Qiu and Mosto Bousmina* 1206

R&D Note

Solid State Rheological Properties of Ultra-high Molecular Weight Polyethylene Foams • *Denis Rodrigue, Zhijie Zhang and Abdellatif Aït-Kadi* 1214

Art & Science: Chemical Reactions via Art • *Abraham Tamir* 1220
